

AEM Announces Sponsorship for WorldSkills Singapore and WorldSkills ASEAN 2023

AEM supports talents of tomorrow in the upcoming WorldSkills Singapore and WorldSkills ASEAN competition

Singapore, 20 Feb 2023 – AEM, a global leader in test innovation, today announced its sponsorship for the upcoming WorldSkills Singapore competition and the 13th WorldSkills ASEAN competition, which are held in Singapore this year.

WorldSkills Singapore is a biennial national skills competition that aims to discover and recognise the best in talents among the youth in Singapore. Outstanding performers of WorldSkills Singapore will represent the nation to compete in the ASEAN-level WorldSkills competition, which is the biggest skills excellence youth competition within the region. As part of the competition, young individuals can showcase their talents and abilities in various skills categories. It aims to promote and upgrade skills standards in the ASEAN region to an international level, and provide an opportunity for the exchange of knowledge, expertise and experience among delegates from member countries.

To support this initiative, AEM will be donating three units of its Network Service Assistant (NSA) test solutions each to two local institutions - Republic Polytechnic and the Institute of Technical Education (East) - to prepare the teams ahead of the WorldSkills Singapore competition on 29 March to 1 April 2023. AEM will also be sponsoring eight units of the testing solutions for the Information Network Cabling challenge during the WorldSkills ASEAN competition on 22-27 July 2023.

Pascal Pierra, Senior Vice President and General Manager, Instrumentation, AEM said, “The rapid advancements in technology have led to an increased demand for new skills and highly-skilled talents. As a global leader in the semiconductor test and handling industry, AEM is committed to raise awareness of the importance of technical excellence and invest in skills development for youths to raise skills standards for the future of work. To this end, the WorldSkills Singapore and WorldSkills ASEAN 2023 are great examples of initiatives that can foster the development of quality vocational, technical and work values among the youths and skilled professionals of today.

AEM places a high value on innovation and upskilling in the dynamic cable and network connectivity testing industry, particularly with the growth in smart building network environments.”

Bruce Poh, Chairman of WorldSkills ASEAN 2023 Organising Committee said, “We are excited for AEM’s support in training Singapore’s competitors and for the WorldSkills ASEAN 2023 Competition. These competitions showcase the best in skills among youths, and go a long way towards the development of industry-relevant vocational education and skills training. Therefore, collaborations with industry leaders such as AEM is critical in promoting the importance of skills and raising the level of skills excellence among our youths in Singapore.”

About AEM

AEM is a global leader in test innovation. We provide the most comprehensive semiconductor and electronics test solutions based on the best-in-class technologies, processes, and customer support. AEM has a global presence across Asia, Europe, and the United States. With manufacturing plants located in Singapore, Malaysia (Penang), Indonesia (Batam), Vietnam (Ho Chi Minh City), China (Suzhou), and Finland (Lieto), and a global network of engineering support, sales offices, associates, and distributors, we offer our customers a robust and resilient ecosystem of test innovation and support.

AEM Holdings Ltd is listed on the main board of the Singapore Exchange (Reuters: AEM. SI; Bloomberg: AEM: SP). AEM's head office is in Singapore.
